

# How Cloud-Based SharePoint Saves Your Company Money

Cloud-based Microsoft SharePoint from Apptix is an affordable, enterprise-class collaboration and content management platform that allows employees, partners, and customers to easily access and exchange vital information securely. It enables collaboration, streamlines internal processes, and automates workflows – with the cost efficiency of a cloud-based solution.

When you implement Microsoft SharePoint 2010 you can share webpages, use discussion forums, archive documents and data, create forms, automate business processes, and control access to information.

With multiple options and packages, Apptix has a solution to address your unique needs while saving your company money. We offer Hosted SharePoint in a multi-tenant or a Dedicated environment. Our Dedicated packages include Foundation, Standard, or Enterprise versions of the platform, to give you added flexibility and functionality.

Cloud-based SharePoint reduces the Total Cost of Ownership (TCO) to deploy SharePoint within your organization. The cloud-based hosted model allows your installation to grow as your company changes so you only pay for the services you actually need and use. You'll also save on IT costs as well because the more complicated issues are handled by Apptix. If you need help, you have access to customer support anytime.

Because there is no need to purchase hardware or software and no maintenance on your part, you'll see huge savings over in-house services. You'll save on travel costs, too, with built-in collaboration software that allows you to review documents using live Version Control, access tasks, contacts and announcement lists, and share team calendars, no matter where your team is located.

Hosted SharePoint also offers add-ons that allow you to customize your service according to your business needs, including:

- **Web Parts** to help you to develop your SharePoint site quickly and easily. Combine information,

**“SharePoint makes it possible for small organizations and non-profits to operate virtually. Apptix Hosted SharePoint has made it possible for us to build a community and respond to its immediate and merging needs in a timely and professional manner.”**

**-Eric Berg**  
Executive Director, LINGOs

build applications and menus, and enhance views without additional code.

- **Team Collaboration Pack** allows you to gather data from multiple sites, increasing productivity.
- **Site Builder Pack** allows you to customize your SharePoint site with templates, enhanced navigation, enhanced calendar features and more.
- **Active Directory (AD) Sync** makes on-boarding and managing Apptix Hosted SharePoint services more efficient by synchronizing user information from the customer's Active Directory database to Apptix's hosted Active Directory database. This allows new services to be added easily, and keeps user information consistent between the customer's environment and the Apptix Control Panel.
- **SharePoint Professional Services** provide expert assistance to customers who want to extend the capabilities of their Apptix Hosted SharePoint service. With help from our experts, you can design, install, configure, and customize a SharePoint solution to meet the unique needs of your organization.

**“Our goal is to provide our customers with the tools to work better together, faster and smarter”**

**-David Ehrhardt**  
President & CEO of Apptix

### **What good are all these benefits without outstanding support?**

Apptix provides live, U.S.-based Tier 1 Customer support 24 hours a day, 7 days a week, 365 days a year. You don't have to be an IT expert. Getting started is easy with over 30 online video tutorials covering libraries, lists, web parts, sites, workspaces and more. You'll also have access to an online support Knowledge Base with articles and how-to guides as well as 40 industry-specific templates. Apptix also offers the industry's most aggressive uptime SLA, so you can be sure that your services are available whenever you need them.

Simple and effective, Hosted SharePoint from Apptix saves you time and money.
