TOP 5
BENEFITS of CLOUD-BASED SHAREPOINT
Enterprise-Class Collaboration

Hosted SharePoint Services from Apptix make collaboration easy with a flexible, customizable platform that enables document sharing, workflows, discussion forums, and more. Utilizing Microsoft SharePoint Server 2010, it is a dynamic, powerful solution to empower teams to work together.

Benefit #1: *A Friendly User Interface*

SharePoint can be used with Microsoft Office, and is accessible by both Windows-based and Apple computers via browser. It is also accessible through mobile devices such as Android, iPad, or IPhone.

Recent interface improvements include enhanced views and menus that simplify navigation within and among SharePoint sites. The built-in search engine allows users to search all document libraries as well as most lists on the SharePoint site. In addition, SharePoint already has familiar productivity tools integrated, including Microsoft Office programs, to make it easy to learn and easy to use - so your productivity increases.

Benefit #2: *Ease of Sharing*

Users can collaborate with ease because SharePoint provides workspaces with document storage and retrieval features, including check-in/check-out functionality, version history, custom metadata, and customizable views.

Apptix's SharePoint solutions connect people with the information and resources they need. They can coordinate calendars, organize documents, and receive important notifications and updates through communication features that include announcements and alerts. In addition, new templates are available for creating blogs and wikis, and mobile users can take advantage of convenient synchronization

capabilities. The information is also secure, only viewable and editable based on the user's permissions.

Easy to manage and easy to scale, SharePoint enables company administrators to deploy a collaborative environment with minimal administrative time and effort, from simple single-server configurations to more

Benefit #3: *Customizable Functionality*

Organizations seeking a more customized deployment than out-of-the-box SharePoint can get started quickly with application templates for addressing specific business processes or sets of tasks. With three different versions available in a Dedicated environment, the level of functionality can be tailored to the organization's specific needs, with a full range of Web Parts also available for additional customization.

Benefit #4: *Security and Compliance*

SharePoint is designed with built-in security and compliance features such as secure, permissions-based access and document version control. Specific workflows and features can also be enabled to ensure compliance with specific industry regulations. Apptix further ensures security by housing the SharePoint servers in SAS 70 Type II/SSAE 16 compliant data centers, wtih military-grade physical and network security.

Benefit #5: *Cloud-based Service Delivery*

Apptix provides SharePoint through the cloud, giving organizations all of the benefits of this enterprise-class communication and collaboration solution without the costs and headaches associated with managing the platform in-house. Benefits include:

• Streamlined implementation
• Reduced Total Cost of Ownership
• Simple and cost-effective scaling as business requirements change
• 24/7 customer support
• World-class security and reliability
